Data X: Your Core System's Missing Brain

Data X enhances interaction with your core system, driving true digital transformation.

Data X is a module builder layer that integrates with your existing core system. It instantly converts any manual, paper-based process into a **fully automated** digital workflow.

📄 Your Core Stays Exactly As It Is

Data X connects securely via official APIs, without modifying your core database. This ensures no custom code, no agents, and no downtime.

⚡ Paper Becomes a Smart Digital Module—in Minutes

Upload any paper form. Data X's AI instantly understands the structure, maps fields, and builds a live digital module.

🚀 Automation That Talks to Your Core—Seamlessly

Once a form is submitted and approved, Data X pushes clean, validated data directly into your core system via API.

🗨 The Result? A Core System That Finally Efficient & Modern

Your core system doesn't speed up, but everything connected to it does!

Go Digital, Instantly. No Code Needed.

Data X System effortlessly turns your paper processes into digital ones. It works with your existing systems without changing anything. Just upload your forms, and Data X instantly makes them digital and ready to use.

1	2	3

1. Paper Forms Go Digital

Your paper forms are instantly converted into digital records. Customers can fill them out easily on any device, ensuring all important information is captured.

2. Anyone Can Build It (No Code)

You don't need to be a programmer; simply drag and drop to create digital forms and automated tasks. Data X handles the rest, connecting easily with your current systems.

3. Your Core Systems Stay The Same

Data X adds a modern digital front-end to your existing systems like T24, Finacle, SAP, or Oracle. They continue to work without disruption, becoming more powerful without any changes to your core technology.

This simple process means Data X handles everything from paper to digital, data extraction, automation, and connection. Your core systems remain secure and untouched.

✓ No System Changes

Transform your processes step-by-step without touching your core systems. Anyone can build digital workflows, saving you from costly IT projects.

✓ Works With Everything You Have

Data X works seamlessly with T24, Finacle, SAP, Oracle, and more. It helps you process documents and automate workflows with ease.

✓ Digital in Minutes, Not Months

Deploy fully automated digital workflows the same day. No coding, no delays, just instant digital transformation.

Paper to Digital in Three Steps. Same Day.

Quickly transform paper documents into digital workflows. Data X makes it simple for anyone to go digital, fast.

1. Paper Forms Go Digital

Upload any paper form. Data X instantly converts it into a digital record, a perfect copy ready for use.

2. Data X Builds It (No Code)

Data X reads your digital record and maps all fields. Non-technical users then set up workflows with simple clicks, no coding needed.

3. Go Live Today

Launch your digital workflow instantly. The digital record is saved, and data moves to your main core systems without delay.

Traditional IT vs. Data X: The No-Code Difference

Factor	Traditional IT	Data X (No-Code)
Speed & Setup	Months	**Minutes**
Coding Needed	Developers	**None**
System Impact	Changes required	**Untouched**
Project Risk	High, slow	**Zero, quick**

IT Departments: From Bottleneck to Strategic Partner

Data X Solves IT's Headaches Without Adding Risk

IT departments are often challenged to digitize processes without risking core systems. This leads to slow projects, backlogs, and strained relationships.

Data X changes this permanently, turning IT into an enabler for **innovation.**

Problems Data X Solves for IT

Digitize Forms in Minutes
Instead of custom development for each form, business teams build them using a no-code, drag-and-drop builder, approved by IT.

No Core System Risk
Data X connects via existing APIs only, with no changes to your core database or systems.

Eliminate Shadow IT
Business units can safely create digital workflows within a secure, governed platform, stopping compliance and security issues.

Ensure Audit Compliance
Every action is timestamped and documented, ensuring full compliance for regulators from day one.

End Constant Firefighting
Stable operations with high uptime, automatic backups, and offline mode mean fewer urgent issues for IT to resolve.

IT Becomes an Enabler
IT moves from being seen as a gatekeeper to a trusted partner, enabling fast and safe innovation for the business.

Real Benefits for IT Leaders

Zero Development Burden
Business teams configure workflows themselves, freeing up developers for critical tasks.

Instant Approvals
Data X integrates with standard APIs, allowing approvals in hours, not months.

Full Control & Visibility
IT retains control over data, APIs, access, and audit logs.

Reduced Support Tickets
Everything is tracked and recoverable, significantly cutting down on support requests.

Future-Proof Integration
Works with any system that has an API, avoiding vendor lock-in.

Security & Compliance Built In
Features bank-grade encryption and is ready for major compliance standards like SOC 2, GDPR, and ISO 27001.

The Bottom Line for IT

Data X **empowers IT** to innovate quickly and safely. It gives IT back its time, credibility, and strategic value by transforming it into an enabler for the business.

One step closer to Digital Transformation

Data X helps organizations turn paper documents into secure, digital workflows. No coding is needed for fast, simple transformation.

Where will my data live?
Your data stays local, whether in your data center, private cloud, or regional deployment. You always control where your information is stored.

Is it secure and compliant?
Yes. Every action is tracked and documents are timestamped. We meet strict regulatory standards to ensure secure and compliant digital workflows.

Will IT approve it?
Yes. Data X digitizes paper without touching your core systems. It uses standard connections, so anyone can go digital without special IT help.

What if the system stops working?
We guarantee 99.9% uptime with constant automated backups. An offline mode keeps field workers productive, ensuring operations never miss a beat.

How accurate is the AI?
Our AI extracts data from paper forms with over 98% accuracy. For complex cases, a human review option is available, and the system continuously learns.

From Paper to Digital. Today.

Easily convert your paper forms into functional digital systems. It's free, fast, and requires no commitment.

> 🗒 **The Next Step Is Simple:**
>
> Pick a form. Any form. We show you how fast it goes digital.

Two ways to get started:

Option A: Send Your Form

Email: Info@dataxsystem.com

Upload: dataxsystem.com/upload

We will convert your paper form into a powerful digital system in hours, no coding needed.

Smart organizations move fast without breaking what works.

Option B: Book a Live Demo

Watch us turn your paper form into a digital system live in just 15 minutes. Get immediate answers to your questions.
