# DATA X SYSTEM — HOMEPAGE (FINAL POLISHED VERSION)

**“Turn Any Paper Form Into a Complete Digital System — In Minutes.”**

---

## HERO SECTION

**Turn Every Paper Form Into a Digital Workflow—Fast.**

**No coding. No IT backlog. No core system changes.**

Your core system (T24, Finacle, SAP, Oracle, Flexcube) is powerful but rigid.

Every new form, workflow, or customer process becomes a long IT project.

Data X Module Builder is the acceleration layer that removes this limitation.

Upload a form → Build workflow → Connect to core → Deploy

Your new digital process goes live in minutes.

---

### Instant Capabilities

- Mobile-responsive digital forms
- Automated workflows & approvals
- PDF generation with perfect formatting
- Real-time API integration

- Secure data storage & dashboards
  - Customer tracking, notifications, and QR access
- 

## Primary CTAs

---

# THE CORE PROBLEM

## Your Business Needs Speed—Your Core System Can't Move Fast

Your core is stable, secure, and essential.

But it wasn't designed to adapt daily.

Traditional process changes require:

- Developers
- IT approvals
- Core customizations
- Long testing cycles

Result:

Slow innovation, manual work, and customers stuck with outdated experiences.

---

# THE ACCELERATION LAYER THAT CHANGES EVERYTHING

## Why Module Builder Exists

Paper forms, PDF forms, email approvals, and manual data entry slow down every department.

Module Builder replaces all of that with a single process:

Form → Workflow → Data → Core Integration → Live Digital System

In minutes.

Without coding.

Without touching your core system.

---

## HOW MODULE BUILDER WORKS

### Step 1 — Upload Any Form (PDF, Paper, or Digital)

Start with the forms your organization already uses:

- Loan applications
- Account opening
- HR forms
- Service requests
- Compliance checklists
- Branch forms
- Internal approvals

Drop the PDF into Module Builder.

The system reads the structure and prepares your blank digital module.

---

## **Step 2 — Build Your Data Schema Visually**

Drag and drop fields to design a clean, structured database.

As you build:

- Validation rules are applied
- Field-level permissions are set
- Logic is created (calculations, conditions)
- Database tables are generated
- Mobile layouts are automatically optimized

No coding.

No database scripting.

No IT involvement.

You design your data and your form at the same time.

---

## **Step 3 — Map the PDF (Pixel Perfect)**

Your digital system must generate documents exactly the way your organization needs them.

Module Builder lets you:

- Position fields on top of your PDF template
- Add signatures
- Insert tables for repeating data

- Add QR codes for verification
- Show/hide fields based on conditions
- Map multi-page or multi-template documents

Every submission generates a perfect document—instantly.

---

## Step 4 — Build the Workflow

Define how work moves across your organization:

- Multi-level approvals
- Branch routing
- Conditions and logic
- Escalations and SLA timers
- Parallel or sequential steps
- Notifications via SMS/Email
- Audit logs and version history

Complex workflows take minutes to build.

---

## Step 5 — Connect to Your Core Systems

Use pre-built connectors or bring your own API.

Common actions:

- Check customer validity
- Pull customer details

- Post loan applications
- Create accounts
- Trigger internal updates
- Retrieve transaction information

Data X becomes the bridge between your customers and your core—without modifying the core itself.

---

## **Step 6 — Deploy Your Module**

One click.

You instantly get:

- A mobile form for customers
- A web portal for staff
- A complete workflow engine
- PDF generation
- Automated notifications
- Dashboards & tracking tools
- Real-time audit trail
- API endpoints

Your new system is now live and production-ready.

---

# HOW THIS TRANSFORMS CUSTOMER EXPERIENCE

## From Slow, Manual, Paper-Based...

- Paper forms take 20–40 minutes to fill
- Staff re-enters data manually
- Customers wait for callbacks
- Approvals get lost in email
- No visibility into status

## ...To Fast, Digital, Mobile-First

Customers can now:

- Scan a QR code at a branch or website
- Fill a mobile-optimized form in minutes
- Upload documents from their phone
- Sign digitally
- Receive instant confirmation
- Track progress in real-time

Result:

Faster service, fewer errors, and a modern experience across every channel.

---

# HOW THIS TRANSFORMS INTERNAL WORKFLOW

## Before Module Builder

- Forms emailed between teams
- Approvals follow unclear paths
- Managers guess where bottlenecks are
- Audits require manual evidence
- Core updates require heavy IT work

## After Module Builder

- Every request enters an automated flow
- Each step is assigned to the correct role
- Approvers receive instant notifications
- SLA timers ensure no delays
- Dashboards show real-time progress
- Audit logs track every action
- Data flows automatically to the core

Workflow becomes:

- Predictable
- Trackable
- Optimized

- Auditable
  - Error-free
- 

# ENTERPRISE-WIDE BENEFITS

## For Customers

- Faster service
- Transparent status tracking
- No need to visit branches
- Fewer documents returned for errors

## For Frontline Staff

- Zero manual data entry
- One-click approvals
- Less paperwork
- More time for customer care

## For Managers

- Real-time dashboards
- Full visibility on bottlenecks
- SLA monitoring
- Immediate workflow adjustments

## For IT

- Fewer development requests
- No core customizations
- Centralized governance
- Stronger architecture and security

### **For the Organization**

- Faster operational cycles
- Higher customer satisfaction
- Lower operational cost
- True digital transformation—not just digitization

---

# **THE FUTURE OF YOUR ORGANIZATION'S WORKFLOWS**

Every process you currently run on paper, Excel, email, or manual entry can be rebuilt into a modern digital experience in minutes.

No code.

No delays.

No dependency on IT.

Your acceleration layer is ready to deploy.

---

## **FINAL CALL TO ACTION**

# See Your Own Form Become a Digital System—Live.

## **Book Live Demo**

We build your form in real-time during the session.

## **Send Your Form**

Upload your PDF. We build it and send it back—free.

---

## STICKY FOOTER BAR
